

MINISONO

Anywhere, Anytime, Anybody

minisono will introduce a new paradigm in ultrasound diagnosis.

Designed for quick and easy use anytime, anywhere, minisono can be used conveniently in space- and time-constrained environments, such as a clinic, hospital ward, emergency room, or operating theater, while ensuring high-quality diagnostic examinations.

In addition, medical practitioners can get up close and personal with patients during examinations, which helps them build trust.

- Application: EM, MSK, Small Parts, Vascular, Abdomen, Urology, Breast
- OS: Windows 10
- Image Review: E-View
- DICOM 3.0

Mobility

minisono is light, compact, and easy to move. You can scan a patient exactly when the need arises and make a diagnosis quickly, anytime, anywhere.

You can perform scans on patients up close and share the screen to help them understand what's happening.

Performance

Alpinion has combined transducer and image-processing technologies to ensure that minisono provides sharper and clearer high-definition 2D images and Doppler information.

Using two types of transducers, Convex and Linear, you can scan from the deepest to the most superficial part of the human body.

User Convenience

All you need is a minisono transducer and a Microsoft Surface tablet; you can quickly and easily use minisono as soon as you connect the tablet with the transducer via USB.

minisono is easy to operate and provides the most essential features, so it is perfect for training medical practitioners in ultrasound scanning.
